

Officevibe Launches Leo, bringing anonymous employee feedback to Slack

Used in over 90 countries, Officevibe continues to close the gap between managers and employees to build happier workplaces with their latest Slack integration.

Montreal, QC—(January 4, 2016) - Officevibe <www.officevibe.com>, the leading employee engagement platform, launched an integration <www.officevibe.com/slack> with Slack enabling anonymous employee feedback to the platform's powerful messaging system. "Leo" the slack bot sends employees a private message asking for their feedback once a week. Bridging employees and managers, the Slack bot ensures that everything remains confidential and anonymous. Leo also reacts, check-ins and reminds you of important activity.

Slack has revolutionized the way we communicate at work. "We couldn't have chosen a better platform to integrate with" says Dan Benoni, CEO of Officevibe. "Not only was this the most requested feature from our users, but both Officevibe and Slack share a similar mission of improving lives at work."

Officevibe traveled to Barcelona, Spain to build the integration in only ten days, in the spirit of creativity, innovation and team building. The team was composed of the CEO and CTO as well as the marketing team while working remotely with another team in Montreal.

OFFICEVIBE MILESTONES (launched October 2014)

- Used in 90 countries
- Integrations with Office 365, Yammer and Salesforce
- More than 1.9 million questions answered on the Officevibe surveys

About Officevibe

Officevibe is an employee engagement platform sending one survey per week to monitor employee satisfaction in real-time, giving a way for employees to express anonymous feedback. The survey questions are simple, fresh and engaging while providing actionable reports. Companies on Officevibe enjoy survey completion rates up to 330% higher than the average. Week after week. The company believes that everyone should be happy at work.
